

**My EHR charting used to
add an hour to my workday.
Not anymore.**

Leverage Your EHR's Ability to Import Patient Notes to Speed Up Your Workflow.

Studies show that charting via an EHR can add almost an additional hour to a physician's workday. With Hils Transcription, physicians generate patient notes using dictation and transcription, and completed notes are sent automatically into your EHR.

Hils Transcription works directly with your EHR vendor to set up the workflow, and in many cases can have it implemented within a few days.

Spend more time interacting with your patients and less time with your computer. Contact Hils Transcription today!
